

ENGINEERING IS OUR PASSION.

Our engineering teams engage early in the design process using their experience to quickly understand the customer's specific requirements, often working alongside their development teams. Using the group's core technologies and product platforms, we identify the best solution to meet or exceed the customer's requirements for performance, reliability, size, and cost.

SENSING AND CONTROL
for sophisticated applications

We develop and produce intelligent sensor systems and control units for the global automotive industry. Our products make engines more efficient, emissions cleaner, cars safer, and help the transition to electromobility.

WE HELP OUR CUSTOMERS COMPETE IN COMPLEX MARKETS

We are proud of the long-term partnership with complex Automotive OEM, Tier 1 and System Suppliers.

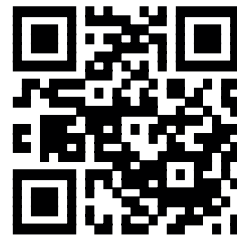

We understand their challenges, have a reputation for providing innovative and reliable technical solutions, and the ability to support them globally. Our geographical footprint shows we are well placed to provide engineering and manufacturing support in most major regions.

LOCAL ENGAGEMENT

We pay particular attention to the local involvement of our companies. This means that we are not only a strong local business partner and reliable employer, but also have a positive impact on the community through social commitment, school partnerships and other projects.

COMPANIES OF THE SENSING AND CONTROL DIVISION

The Sensing and Control Division of KYOCERA AVX is a trusted partner for global automotive players for more than 50 years. Since 2017 we are part of the KYOCERA AVX Corporation, one of the leading electronic manufacturing companies worldwide.
